

1. Record-breaking bridge

This week's lesson is about some of China's spectacular achievements in the field of engineering, in particular the recent opening of a 42-kilometer bridge that has been recognized by *Guinness World Records* as the world's longest bridge over water.

Level

Intermediate and above (equivalent to CEF level B1 and above)

How to use the lesson

1. Ask the students if they know what are the world's biggest/tallest/longest man-made structures of different kinds (building, dam, bridge, tunnel, stadium, etc.). What is the biggest building (or other man-made structure) in their country, and what do they know about it? Are there any other examples of construction/engineering in their country that they think are particularly important/impressive? Tell the students that the lesson is going to concern China, then ask them what things they associate China with. If any of your students have ever been to China, encourage them to describe their experiences there to the rest of the class.
2. Give your students between five and ten minutes to read through Worksheet A, encouraging them to look up new vocabulary. Note that many of the words that might be new are not in the glossary because they form part of Exercise 1.
3. Give each student a copy of Worksheet B, then divide the class into pairs and ask students to work together to complete Exercise 1, in which they have to find the words to match the definitions.
4. Check answers in open class.
5. Keeping the students in their pairs, hand out Worksheet C and ask the students to complete the crossword.
6. Check answers in open class.

Answers:

Exercise 1

1. countless 2. withstand 3. pillar 4. spectacular 5. typhoon 6. entire
7. curved 8. skyscraper 9. record 10. consists of 11. lane 12. engineering
13. power plant 14. point out 15. toll

Exercise 2

1. water 2. south 3. ship 4. free 5. stretches 6. bay 7. metal 8. straight
9. opened 10. built 11. Roads 12. railroad 13. strong 14. distance

If the sentences have been completed correctly, *thirty thousand* will read from top to bottom.
